

## Training for train drivers and shunters according to EBOA/BOA

### DESCRIPTION

The EBOA requires that railway operating staff have sufficient knowledge. Drivers of connecting and works railways must additionally prove their skills and knowledge during a test run under the supervision of an expert.

In this seminar, the theoretical knowledge is imparted that railway operating staff need to work successfully. The railway system is explained from the ground up, the operation of the railway is explained and the topics of wagon knowledge and safety in the track area are also dealt with. The railway operation is taught in a practical way, especially in the area of shunting, the important basics are dealt with in detail. We are also happy to offer you this seminar on site at your company as an in-house seminar. With in-house training, special attention can be paid to the existing local conditions.
