

Infrastructure Engineer – Project Manager (M/F)

CERTIFER is an international railway inspection, testing and certification company founded in 1997, expert in the mobility sector.

Our group, headquartered in Valenciennes (France), is present in ten countries with subsidiaries in Algeria, Australia, Belgium, Brazil, France, Italy, Spain, Germany, Austria, the Netherlands, Norway, Denmark, Sweden, China and Turkey and branches in the United Arab Emirates and Vietnam.

Specialized in the mobility & railway industry, we provide our testing, inspection, and certification services to vehicle and component manufacturers, rail operators, infrastructure managers.

The CERTIFER group acts as a Designated Body (DeBo) in different countries, as a Notified Body (NoBo) at European level and is also recognized as an Independent Safety Assessment Body (AsBo).

In order to reinforce its Infrastructure department in Brussels, CERTIFER is looking for an experienced Infrastructure Project Engineer to carry out Infrastructure system assessment and project management.

Role and responsibilities

The Engineer - Project Manager will be responsible for the day-to-day project management of assessments of the railway infrastructure (engineering structure, track, catenary, people with reduced mobility aspect of railway station, ...): he/she will be requested to:

- ✓ Analyse customers' requests;
- ✓ Prepare the technical offers;
- ✓ Conduct the project in the respect of the contract conditions;
- ✓ Prepare the assessment activities;
- ✓ Identify risks at project level;
- ✓ Interact with the customer and other Assessment Bodies;
- ✓ Provide specific expertise in evaluation activities;
- ✓ Conduct the technical evaluation with the support of experts: documentation review / inspections / audits / tests, ...
- ✓ Redact technical and audit reports;
- ✓ Witnessing;
- ✓ Interact with national or European safety authorities;
- ✓ Identify new business opportunities and develop the business of the infrastructure assessment department;
- ✓ Monitor legislations and standards evolutions at national and European levels.

He/she will report to the Infrastructure Technical Manager.

We are looking for:

- ✓ Engineer with experience in the rail or guided transport sector (metro, tramway) ;
- ✓ Technical knowledge :
 - Design and building railway infrastructure according to European technical rules or according to urban heavy railway infrastructure such as the metro;
 - Belgian technical rules of Infrabel is a plus;
 - Design and building railway station according to European technical rules;
 - Belgian technical rules of SNCB (Revalor) is a plus;
 - EN standards about railway infrastructure is a plus;
- ✓ Open minded, factual, organised and proactive;
- ✓ Able to work independently and in a team, set priorities and meet deadlines;
- ✓ Ability to communicate with customers for technical and commercial matters;
- ✓ Facility to conduct technical assessments and to write reports
- ✓ Ability to work in multiple languages (Dutch, French, English).
- ✓ Native Dutch speaker is a plus;

- ✓ Is likely to undertake short-term assignments abroad.

What we offer

- ✓ Permanent contract in an international growing company
- ✓ Competitive salary including mobile phone, meal vouchers, pension scheme & hospitalisation, eco-purchase voucher, company bonus
- ✓ Positive & stable working atmosphere
- ✓ Flexible working hours
- ✓ Home working policy
- ✓ Company car or public transportation offered
- ✓ +/-30 days off a year
- ✓ Our office is located next to the Brussels-Central station (easy to get to), in the great area of Grand Sablon
