

## Signalling Project Manager - Assessor (M/F) – Valenciennes

**CERTIFER** is a French railway certification company founded in 1997. Headquartered in Valenciennes (France), the CERTIFER Group is present in ten countries with subsidiaries in Algeria, Australia, Belgium, Brazil, France, Italy, Spain and Turkey and branch in UAE and Viet Nam.

The CERTIFER Group is acting as a designated body in Belgium, France, Algeria, Luxembourg, Italy, Spain, Switzerland and Turkey and as “notified body” at European level. CERTIFER is also recognized as Assessor (ISA) for independent safety assessment and as Assessment Body (AsBo) for risk management assessment following the common safety methods (CSM-RA).

In order to reinforce its Control-Command and Signalling department, CERTIFER is looking to recruit a Signalling Engineer.

### Responsibilities:

In collaboration with Certifer's project managers and assessment teams, she/he will be responsible for day-to-day **railway and urban transportation projects** management of on-board and trackside signalling systems:

- ✓ Management of projects : Interface with customers, assessment teams and other Assessment bodies
- ✓ Preparation of safety/interoperability technical offers and assessment plans
- ✓ Preparation of the assessment activities and Review of technical/project documentation, safety/interoperability assessment and audit reports

According to her/his experience, the Project Manager could carry out technical assessments:

- ✓ Providing her/his expertise for the assessment activities in Control Command Signalling
- ✓ Realization of safety (CSM-RA, CENELEC, national standards), interoperability assessments (according to TSIs) for railway and urban transportation projects

He/She will closely monitor legislations and standards evolutions at national and European level.

He/She will participate in keeping and developing Certifer knowledge related to his expertise and developing Signalling activities with the Signalling Technical manager.

### Background:

- ✓ Master's Degree in engineering
- ✓ At least **5 years of professional experience**, with an extensive experience in Control-Command and Signalling Safety and/or signalling of railway and urban (metro/tramway) transportation

### Technical knowledge:

- ✓ Thorough knowledge of control, command signalling systems
- ✓ Relevant knowledge of ERTMS/ETCS / CBTC / National Signalling systems,
- ✓ A knowledge of interoperability standards (CCS Technical Specification for interoperability) and regulatory framework and/or inspection and certification field would be an advantage

### Skills:

- ✓ Excellent language skills: French (native speaker) and a B2/C1 level in English; Another language would be an asset
- ✓ Geographically mobile: likely to undertake short-term assignments in France and abroad
- ✓ Open minded, well organised, and proactive
- ✓ Problem solver
- ✓ Able to work independently, set priorities and meet deadlines
- ✓ Facility to conduct audits and writing reports (technical audit and safety assessment)

### What we offer:

- ✓ A motivating working environment within a growing group, offering various opportunities
- ✓ A fast-growing sector in Europe and worldwide.
- ✓ A Permanent contract.
- ✓ A Remuneration commensurate with skills and experience
