DESCRIPTION

This seminar covers the technical specification for interoperability relating to the "locomotives and passenger rolling stock" subsystem of the rail system in the European Union (Regulation 1302/2014/EU).

This seminar provides a general overview of the current status of the Loc&Pass TSI as well as general basics on the TSIs. Case studies from practice:

- Which TSI requirements must my rolling stock fulfill?
- Which modules do I choose? Which standards are mandatory and which are "only" recommended?

SEMINAR CONTENTS

DAY 1 09.30-17.00

- Rolling stock admission process
 - Presentation of stakeholders in the rolling stock commissioning process
 - Hierarchy of standards
 - Identification of the referential applicable to a project
- Scope of application of the TSI according to the project
- Conduct of a notified body assignment.
- Use of TSI's to identify regulatory requirements.
- List and identification of the annexed texts
