

Fundamentals for future safety managers in the railway manufacturing sector

DESCRIPTION

This seminar will provide you with a basic knowledge of relevant European and German legal regulations and their correlations as well as familiarity with the aspects of safety and safety-related tasks and activities. This gives you the best prerequisites to take on the role of Safety Manager at a manufacturer (Rolling stock, components).

Seminar content:

- General legal Fundamentals, CENELEC standards, CSM, RAMS
- Definition of the role of "Safety Manager" and its tasks/activities
- Contents of the safety plan
- Practical application of safety activities in the product life cycle
